355° F (179° C) COC

Flash Point Method:

Cleveland Open Cup Test

Extinguishing Media:

Extinguish with dry chemical, CO2, water spray, foam, sand, and/or earth. Water and foam may cause frothing.

Special Considerations:

Fire fighters should enter area wearing positive pressure respiratory protection.

Personal Precautions:

No action should be taken that may involve personal risk. In the event of a spill immediately contact upper management for final instructions. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled materials. No smoking. Shut off and keep spilled product away from all possible ignition sources. Avoid breathing and vapor or mist that may be produced. Ensure proper ventilation. Don appropriate personal protective equipment before proceeding with any cleanup (**See section 8**).

Environmental Precautions:

Avoid dispersal of spilled material and runoff from contacting soil, waterways, drains, and sewers. Inform all relevant authorities if the product has caused environmental pollution to sewers, waterways, soil, air, etc.

After donning proper personal protective equipment (**See section 8**) transfer bulk of material into another container. Dilute with water and mop up if product is water-soluble if not absorb any remaining residue with proper absorbents such as earth or vermiculite. Do not use any combustible material as an absorbent. Sweep up and dispose of as solid waste in accordance with applicable federal, state, and local regulations. Contact a certified/licensed waste disposal company for proper disposal of waste. Absorbent material may pose the same hazard (if any) as the spilled product.
