SECTION 4 - FIRST-AID MEASURES

4.1 Description of First-Aid M	Aeasures
General Measures	: Call a physician immediately.
Inhalation	: Remove person to fresh air and keep comfortable for breathing.
Skin Contact	: Wash skin with plenty of water. Take off contaminated clothing. If skin irritation or rash occurs: Get medical advice/attention.
Eye Contact	: Rinse eyes with water as a precaution.
Ingestion	: Do NOT induce vomiting. Call a physician immediately.
First-Aid Responder Protection	: Wear adequate personal protective equipment based on the nature and severity of the emergency.
4.2 Most Important Sympton	ms and Effects, Both Acute and Delayed
Symptoms of Exposure	: None Identified.
Delayed Effects	: No known delayed effects.
Immediate Effects	: No known immediate effects.
Chronic Effects	: No known chronic effects.
Target Organs	: None Identified.

Use only with adequate ventilation. General ventilation (typically 10 air changes per hour) should be used. Local exhaust ventilation or an enclosed handling system may be necessary to control air contamination below that of the lowest OEL from the table above. **Personal Protective Equipment** : Safety glasses with side shields are recommended as a minimum for any type of industrial chemical handling. Eye / Face Protection Where eye contact with this material could occur, chemical splash proof goggles are recommended. Hand Protection : Chemical-resistant gloves, tested according to ASTMF903-17. : Choose gloves to protect hands against chemicals depending on the concentration and quantity of the Remarks hazardous substance and specific to the place of work. **Skin and Body Protection** : For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or repeated contact could occur, use protective clothing impervious to the ingredients listed in Section 2. **Respiratory Protection** : An approved respirator with an organic vapor cartridge may be permissible under certain circumstances where airborne concentrations are expected to exceed occupational exposure limits. Filter type : Organic vapour type. If needed, compliance with OSHA standard 29 CFR 1910.134 is necessary. Compliance **Other Protective Equipment** : Safety showers and eye-wash stations should be available in the workplace near where the material will be used. **Environmental Exposure Controls** : Avoid release to the environment.

SECTION 13 - DISPOSAL CONSIDERATIONS

13.1 Waste Treatment Methods Waste Disposal : Product is suitable for burning in an enclosed, controlled burner for fuel value. Hazard characteristics and regulatory waste stream classification can change with product use and location. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste material must be disposed of in compliance with the respective national, federal, state, and/or local regulations. Waste Disposal Of Packaging : Consult with your local landfill to determine if empty small containers can be disposed of along with regular trash pickup. For disposal of large containers (typically 10 gallons or larger), or for containers not suitable for landfill, a licensed reconditioner should be used.

Landfill Precautions : Not Available.

Incineration Precautions

: Not Available.
